Clear Thinking Shane Parrish, 2023-10-03 AN INSTANT NEW YORK TIMES BESTSELLER Few things will change your trajectory in life or business as much as learning to think clearly Yet few of us recognize opportunities to think in the first place You might believe you re thinking clearly in the moments that matter most But in all likelihood when the pressure is on you won t be thinking at all And your subsequent actions will inevitably move you further from the results you ultimately seek love belonging success wealth victory According to Farnam Street founder Shane Parrish we must get better at recognizing these opportunities for what they are and deploying our cognitive ability in order to achieve the life we want Clear Thinking gives you the tools to recognize the moments that have the potential to transform your trajectory and reshape how you navigate the critical space between stimulus and response As Parrish shows we may imagine we are the protagonists in the story of our lives But the sad truth is most of us run on autopilot Our behavioral defaults groomed by biology evolution and culture are primed to run the show for us if we don t intervene At our worst we react to events without reasoning not even realizing that we ve missed an opportunity to think at all At our best we recognize these moments for what they are and apply the full capacity of our reasoning and rationality to them Through stories mental models and more Parrish offers the missing link between behavioral science and real life outcomes The result is a must have manual for optimizing decision making gaining competitive advantage and living a more intentional life

To Light the Flame of Reason Christer Sturmark, Douglas Hofstadter, 2022-03-15 To Light the Flame of Reason is all about the art of clear thinking an art that is needed now more than ever in the world we now live in Written for anyone who wants to navigate better in this world filled with populist dogmas anti science attitudes and pseudo philosophy authors Christer Sturmark and Douglas Hofstadter provide a set of simple tools for clear thinking as well as a deeper understanding of science truth naturalism and morality It also offers insights into the rampant problems of extremism and fundamentalism and suggestions for how the world can move towards a new enlightenment The book argues that we need to reawaken the basic values and ideals that defined the original age of enlightenment We need to accept the idea that the world we inhabit is part of nature and that it has no trace of supernatural or magical forces Ethical questions should be detached from religion This doesn t mean that the questions become any easier just that ideas are tested and judged without being profoundly tainted and constrained by religious dogmas Such a form of secular humanism builds on the power of free thought the power to investigate and understand the natural world Although not everything can be investigated or understood the sincere quest for knowledge and understanding establishes a flexible nondogmatic attitude toward the world Curiosity and openness lie at the core of such an attitude The scientific method of careful and open minded testing as well as science s creative and reflective ways of thinking provides key tools What clear science inspired thinking helps us to understand among many other things is that a person can be good and can be motivated to carry out morally good actions without ever bowing to or being limited by supposedly divine forces To Light the Flame of Reason will appeal to adults who are trying to figure out how to deal with the ever increasing daily bombardment of conflicting messages about what is right true sensible or good and it should appeal even more to teenagers and university students who are struggling to find a believable and reliable philosophy of life that can help guide them in their choices of what and whom to trust and how to act both on the personal and the social level Today more people have greater access to information and knowledge than ever was dreamt of before and more people are concerned about the world situation More people have the chance through their own actions to make a difference Each one of us as an individual matters It is thus vitally important that each of us should choose in a conscious and reflective manner our own views of reality of the world and of humanity And this means that it is crucial for us all to train ourselves in the art of thinking clearly Christer Sturmark along with Pulitzer Prize winning author Douglas Hofstadter argue that we must refocus our efforts on cultivating a secular society and in doing so we will rediscover the values and ethics that are so foreign in today s society

The Concept of Argument Harald R. Wohlrapp, 2014-06-26 Arguing that our attachment to Aristotelian modes of discourse makes a revision of their conceptual foundations long overdue the author proposes the consideration of unacknowledged factors that play a central role in argument itself These are in particular the subjective imprint and the dynamics of argumentation Their inclusion in a four dimensional framework subjective objective structural procedural and the focus on thesis validity allow for a more realistic view of our discourse practice Exhaustive analyses of fascinating historical and contemporary arguments are provided These range from Columbus s advocacy of the Western Passage to India over the trial of King Louis XVI during the French Revolution to today s highly charged controversies surrounding euthanasia and embryo research Excavating foundational issues such as the purpose of argument itself assent of an audience or critical examination of validity claims and the contested role of argument as a generator of knowledge the book culminates in a discussion of the relationship between rationality and reasonableness and criticizes the restrictions of rational argument relying on fixed logical economic or cultural criteria that in reality are mutable Here a true open argument requires the infusion of Paul Lorenzen s principle of transsubjectivity which recognizes but transcends the partiality of the individual and which can be seen in the pragmatic and expanding consensus that humanity can control itself to safeguard the future of a fragile damaged world
