

Perioperative Care Case Study

The nurse begins the preoperative assessment by taking Ms. Jackson's vital signs.

1. Which vital sign requires follow-up by the nurse?

- A) BP of 160/88.
- B) Pulse of 68.
- C) Respirations of 14.
- D) Temperature of 97.2° F. - A) BP of 160/88.

This blood pressure is elevated and requires further action by the nurse.

The nurse reviews the medications taken by Ms. Jackson. Ms. Jackson states she has been taking two medications, hydrochlorothiazide (Hydrodiuril), a diuretic, and warfarin (Coumadin), an anticoagulant, every day for over a year.

2. What nursing action is most important?

- A) Observe the appearance of the client's oral mucosa.
- B) Assess the client for any signs of excessive bruising.
- C) Review common side effects of each of the medications.
- D) Explain the need to hold the warfarin prior to surgery. - D) Explain the need to hold the warfarin prior to surgery.

Anticoagulants increase the risk for bleeding during surgery and the postoperative period, so the nurse must explain the need to hold the warfarin prior to surgery and instruct the client to contact the surgeon to determine how long before surgery the medication should be stopped.

The nurse then reviews Ms. Jackson's preoperative lab test results, drawn earlier in the week.

3. Which serum lab value requires follow-up by the nurse?

- A) Sodium of 135 mEq/L.
- B) WBC of 14,000/mm³.
- C) Creatinine of 0.8 mg/dl.
- D) Hemoglobin of 14 g/dl. - B) WBC of 14,000/mm³.

The normal WBC count is 5,000 to 10,000/mm³. An increase may indicate the onset of an infection, which may be a contraindication to surgery. The nurse should notify the surgeon of this abnormal lab value.

The nurse talks with Ms. Jackson about what to expect the day of surgery and during the immediate postoperative period. The nurse provides instructions regarding cough and deep breathing exercises. Ms. Jackson performs a return demonstration by breathing in through her mouth deeply and exhaling through pursed lips forcefully and rapidly.

4. What action should the nurse implement?

Preoperative Assessment and Perioperative Management Mark Radford, Clare Evans, Alastair Williamson, 2011 Pre operative assessment of the surgical patient is a key part of the perioperative process However it is one that cannot be separated from the other aspects of perioperative management both clinical and administrative that ensures the safe and effective treatment of surgical patients There are a number of books on the market that examine perioperative management anaesthesia and surgical nursing that are only able to touch on the pre operative assessment process Pre Operative Assessment Perioperative Management sets out to be different by bridging the gap between these texts and the evolving and developing area of practice that pre operative assessment has become in modern healthcare In order to achieve this Pre Operative Assessment Perioperative Management has set out to deliver the core clinical aspects of practice linked to the education and service development needs of a perioperative service The challenge for such a book is to integrate this knowledge effectively using the best evidence base for use in every day practice The brief to the contributors was to help define pre operative assessment utilising their expertise to draw out some of the leading practices and thoughts of the day They have achieved this ensuring that the reader has access to some of the leading experts in international perioperative practice They have done this in an open and accessible style that will guide the reader though some complex and demanding subjects to enable them to deliver better front line care to surgical patients

A Textbook of Perioperative Care Kate Woodhead, Paul Wicker, 2005-05-18 Woodhead and Wicker s new text will be the foremost reference source for all perioperative practitioners The content mirrors the dynamics of modern perioperative practice by focusing on surgical interventions in all the environments in which it is currently practised including A this book does not attempt to to reflect the needs of all specialties but instead concentrates on the principles of practice applicable to any setting and any specialty It has a very practical focus it aims to be the book that nurses and ODPs reach for in order to answer their practical questions but is not be procedure driven Instead it sets out the principles of perioperative practice from which practitioners will be able to develop their own practice techniques Reflects principles of practice applicable to any perioperative environment Strong practical focus Edited by two of the biggest names in the international perioperative nursing sphere with contributions from other well known and authoritative sources Excellent opportunities to develop links with the National Association of Theatre Nurses and the European Operating Room Association The team of contributors are experienced practitioners working directly with perioperative patients or in perioperative education An original model for ethical practice is proposed the Reid model is the first such ethical model to be proposed for the perioperative environment Includes one of the only chapters in any perioperative book which specifically focuses on the care of the elderly The research chapter encourages the use of evidence based practice and the development of perioperative research The unique chapter on care of the mentally ill will support practitioners who are not qualified in psychiatry to care for mentally ill patients This is an area where there is a great information deficit Key points listed for each chapter Sections have been completely revised from previous edition key subject areas now stand alone chapters rather than sections within much larger chapters creates ease of access for user Change of editorship Recognises the diversity of perioperative environments much more explicitly than previous edition
