The Fantasy of Individuality Almudena Hernando, 2017-08-14 The Enlightenment promised humanity a bright future of emancipation which never actually materialized. Instead, our social order is still based on gender inequality which rests upon a false conviction that the individual can be conceived of as separate from community; that the more individualized a person is, the less they need to establish links with their community to feel safe, and that the more they use reason to build a relationship with the world, the less they need emotions. This conviction, which guides the ideals of our social system, is based on a fantasy: the fantasy of individuality. This volume is a step in fleshing out the historical reasons for gender inequality, from the origins of humankind to present times in the Western world. It is a theoretically informed and up-to-date overview of the history of gender inequality that takes as its starting point the mechanisms through which human beings construct their self-identity. Starting from a peripheral interdisciplinary and heterodox perspective, this book intends to appraise the complexity of gender identity in all its richness and diversity. It seeks to understand the persistence of relationality in supposedly fully individualized male selves and the construction of new forms of individuality among women that did not follow the masculine model. It is argued here that by balancing community and self beyond the contradictions of hegemonic masculinity, modern women are struggling to build a new, more empowering form of personhood. The author is an archaeologist who uses her discipline not only to provide data, theory, and a long-term perspective, but also in a metaphorical sense to construct a socio-historical genealogy of current gender systems through an examination of how personhood and self-identity have been constructed in the Western world.

The Presentation of Self in Everyday Life Erving Goffman, 2021-09-29 A notable contribution to our understanding of ourselves. This book explores the realm of human behavior in social situations and the way that we appear to others. Dr. Goffman uses the metaphor of theatrical performance as a framework. Each person in everyday social intercourse presents himself and his activity to others, attempts to guide and control the impressions they form of him, and employs certain techniques in order to sustain his performance, just as an actor presents a character to an audience. The discussions of these social techniques offered here are based upon detailed research and observation of social customs in many regions.

Empire Michael Hardt, Antonio Negri, 2001-09-15 Imperialism as we knew it may be no more, but Empire is alive and well. It is, as Michael Hardt and Antonio Negri demonstrate in this bold work, the new political order of globalization. Their book shows how this emerging Empire is fundamentally different from the imperialism of European dominance and capitalist expansion in previous eras. Rather, today's Empire draws on elements of U.S. constitutionalism with its tradition of hybrid identities and expanding frontiers. More than analysis, Empire is also an unabashedly utopian work of political philosophy.
