Law, Capitalism and Power in Asia Kanishka Jayasuriya,2006-06-19 A challenging and provocative book that contests the liberal assumption that the rule of law will go hand in hand with a transition to market based economies and even democracy in East Asia Using case studies from Hong Kong China Indonesia Malaysia Taiwan Japan and Vietnam the authors argue that the rule of law is in fact more likely to provide political elites with the means closely to control civil society It is essential therefore to locate conceptions of judicial independence and the rule of law more generally within the ideological vocabulary of the state

Language Shattered Maghiel van Crevel,1996 *Language Shattered* is both a history of poetry from the People s Republic of China and a case study of the oeuvre of a leading Chinese poet After the stifling orthodoxy of the 1950s and early 1960s the terror of the Cultural Revolution 1966 1976 brought official Chinese literature to a total standstill At the same time disillusioned youths were more or less accidentally exposed to a varied body of foreign literature and began writing underground poetry In the 1980s this poetry scene now above ground became one of pluriformity and proliferation in both official and unofficial circuits The brutal suppression of the 1989 Protest Movement gave it an exile offshoot The historical overview in Part I of this book is complemented in Part II by a discussion of Duoduo s poetry Duoduo s career as a poet reflects the vicissitudes of Chinese Experimental poetry and his beautiful headstrong poems merit attention in themselves They show that Chinese poetry is not just of interest as a chronicle of Chinese politics but as literature in its own right

The New Rich in China David Goodman, 2008-05-07 Three decades of reform since 1978 in the People's Republic of China have resulted in the emergence of new social groups which have included new occupations and professions generated as the economy has opened up and developed and most spectacularly given the legacy of state socialism the identification of those who are regarded as wealthy. However, although China's new rich are certainly a consequence of globalization, there remains a need for caution in assuming either that China's new rich are a middle class or that if they are they should immediately be equated with a universal middle class. Including sections on class status and power, agency and structure and lifestyle, *The New Rich in China* investigates the political, socio-economic and cultural characteristics of the emergent new rich in China, the similarities and differences to similar phenomena elsewhere and the consequences of the new rich for China itself. In doing so, it links the importance of China to the world economy and helps us understand how the growth of China's new rich may influence our understanding of social change elsewhere. This is a subject that will become increasingly important as China continues its development and private entrepreneurship continues to be encouraged and as such *The New Rich in China* will be an invaluable volume for students and scholars of Chinese studies, history and politics and social change.

Zero Emissions Power Cycles Evgeny Yantovsky, J. Gorski, Mykola Shokotov, 2009-04-23 Focusing on fossil-fueled non-polluting power generation systems, *Zero Emissions Power Cycles* presents alternative solutions to the severe emissions problems of power plants. Along with a description of new thermodynamic cycles and the results of computational analyses, this volume provides modern analytical tools and equations to evaluate exergy.

Global Warming and Biological Diversity Robert L. Peters, Thomas E. Lovejoy, 1992-01-01 The biological effects of global warming should be of concern to all thinking individuals for warming could cause profound disruption of natural ecosystems and could threaten many species with extinction. This important book, the first to discuss in detail the consequences of global warming for ecosystems, includes commentary by distinguished scientists on many aspects of this critical problem. Experts describe responses of animals and plants to previous climate changes, interactions between various environmental components, precipitation and soil chemistry, for example, and synergisms between climate change and human activities such as deforestation. They consider many specific ecosystems, including tropical forests, the deciduous forests of eastern North America, the forests of the Pacific Northwest, Mediterranean-type ecosystems in California, arctic tundra and arctic marine systems. Offering discussions that are both factual and speculative, the volume points the way to future investigations of the implications of global warming.

No Fire Next Time Patrick D. Joyce,2018-08-06 Why did Black Korean tensions result in violent clashes in Los Angeles but not in New York City In a book based on fieldwork and on a nationwide database he constructed to track such conflicts Patrick D Joyce goes beyond sociological and cultural explanations No Fire Next Time shows how political practices and urban institutions can channel racial and ethnic tensions into protest or alternately leave them free to erupt violently Few encounters demonstrate this connection better than those between African Americans and Korean Americans Cities like New York where politics is noisy contentious and involves people at the grassroots have seen extensive Black boycotts of Korean owned businesses usually small grocery stores African Americans in Los Angeles have sustained few long term boycotts of Korean American businesses but the absence of routine contention there goes hand in hand with the large scale riots of 1992 and continuous acts of individual violence In demonstrating how conflicts between these groups were intimately tied to their political surroundings this book yields practical lessons for the future City governments can do little to fight widening economic inequality in an increasingly diverse nation Joyce writes But officials and activists can restructure political institutions to provide the foundations for new multiracial coalitions
