**The Hunger Fix** Pamela Peeke, 2013-09-17 The body's built-in reward system driven by the chemical dopamine tells us to do more of the things that give us pleasure. Creative energy, falling in love, entrepreneurship, and even the continued propagation of the human race are driven by this system. Unfortunately, so is the urge to overeat. In *The Hunger Fix*, Dr. Pam Peeke uses the latest neuroscience to explain how unhealthy food and behavioral fixes have gotten us ensnared in a vicious cycle of overeating and addiction. She even shows that dopamine rushes in the body work exactly the same way with food as with cocaine. Luckily, we are all capable of rewiring, and the very same dopamine-driven system can be used to reward us for healthful, exciting, and fulfilling activities. *The Hunger Fix* lays out a science-based three-stage plan to break the addiction to false fixes and replace them with healthier actions. Fitness guides, meal plans, and recipes are constructed to bolster the growth of new neurons and stimulate the body's reward system. Gradually, healthy fixes like meditating, going for a run, laughing, and learning a new language will replace the junk food, couch time, and other bad habits that leave us unhappy and overweight. Packed with practical tips, useful advice, and plenty of wit, wisdom, and inspiring stories of those who have successfully transformed their bodies, *The Hunger Fix* is a life-changing program for anyone of any size trapped by food obsession and the urge to overeat.

**Always Hungry?** David Ludwig, 2016-01-05 Leading Harvard Medical School expert and obesity warrior, *Time* magazine Dr. David Ludwig rewrites the rules on weight loss, diet, and health in this guide to retraining your cells and reclaiming your health for life. Forget everything you've been taught about dieting. In *Always Hungry*, renowned endocrinologist Dr. David Ludwig explains why traditional diets don't work and presents a radical new plan to help you lose weight without hunger, improve your health, and feel great. For over two decades, Dr. Ludwig has been at the forefront of research into weight control. His groundbreaking studies show that overeating doesn't make you fat; the process of getting fat makes you overeat. That's because fat cells play a key role in determining how much weight you gain or lose. Low-fat diets work against you by triggering fat cells to hoard more calories for themselves, leaving too few for the rest of the body. This hungry fat sets off a dangerous chain reaction that leaves you feeling ravenous as your metabolism slows down. Cutting calories only makes the situation worse by creating a battle between mind and metabolism that we're destined to lose. You gain more weight even as you struggle to eat less food. *Always Hungry* turns dieting on its head with a three-phase program that ignores calories and targets fat cells directly. The recipes and meal plan include luscious, high-fat foods like nuts and nut butters, full-fat dairy, avocados, and dark chocolate, savory proteins, and natural carbohydrates. The result: Fat cells release their excess calories, and you lose weight and inches without battling cravings and constant hunger. This is dieting without deprivation. Forget calories. Forget cravings. Forget dieting. *Always Hungry* reveals a liberating new way to tame hunger and lose weight for good.
