**Strengthening Forensic Science in the United States** National Research Council, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community, 2009-07-29 Scores of talented and dedicated people serve the forensic science community performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call to action for Congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

**Federal Rules of Evidence 2017-2018 Statutory and Case Supplement to Fisher's Evidence** George Fisher, 2017-08-16 This statutory and case supplement incorporates the latest statutory changes and proposed revisions and the most recent U.S. Supreme Court decisions bearing on evidence law. The statutory component of this volume includes proposals to amend Rule 803.16 and to add two new authentication rules, 902.13 and 902.14. These changes are set to take effect on December 1, 2017. Also included is a newly proposed revision of Rule 807, recently released for public comment and not set to take hold before December 1, 2019. The Advisory Committee's Notes to all these proposed changes appear along with explanatory editor's notes. The statutory component also presents a side-by-side reprinting of the older pre-2011 unstyled Federal Rules of Evidence and the newly restyled rules to allow for ready comparison. Editor's notes point out those areas where the restyling project, contrary to its authors' claimed intentions, worked substantive changes in the rules. The case supplement analyzes the Supreme Court's 2017 decision in *Peña-Rodriguez v. Colorado*, in which the Court ruled that the Sixth Amendment's guarantee of an impartial jury overcomes Rule 606(b) and its state-law equivalents and permits defendants to present juror testimony about certain expressions of ethnic or racial bias in the jury room. The supplement addresses the Court's related 2014 ruling in *Warger v. Shauers* as well as its 2015 decision in *Ohio v. Clark* and 2013 ruling in *Salinas v. Texas*. *Clark* addresses whether the admission against the defendant of a young child's allegation of abuse, made out of court and offered in lieu of the child's testimony at trial, violated the defendant's confrontation right. And *Salinas* examines the prosecution's use in its case in chief of a suspect's silence in response to noncustodial police questioning.
