Democracy and Education John Dewey, 1916 *Renewal of Life by Transmission* The most notable distinction between living and inanimate things is that the former maintain themselves by renewal A stone when struck resists If its resistance is greater than the force of the blow struck it remains outwardly unchanged Otherwise it is shattered into smaller bits Never does the stone attempt to react in such a way that it may maintain itself against the blow much less so as to render the blow a contributing factor to its own continued action While the living thing may easily be crushed by superior force it none the less tries to turn the energies which act upon it into means of its own further existence If it cannot do so it does not just split into smaller pieces at least in the higher forms of life but loses its identity as a living thing As long as it endures it struggles to use surrounding energies in its own behalf It uses light air moisture and the material of soil To say that it uses them is to say that it turns them into means of its own conservation As long as it is growing the energy it expends in thus turning the environment to account is more than compensated for by the return it gets it grows Understanding the word control in this sense it may be said that a living being is one that subjugates and controls for its own continued activity the energies that would otherwise use it up Life is a self renewing process through action upon the environment

Command Of The Air General Giulio Douhet, 2014-08-15 In the pantheon of air power spokesmen Giulio Douhet holds center stage His writings more often cited than perhaps actually read appear as excerpts and aphorisms in the writings of numerous other air power spokesmen advocates and critics Though a highly controversial figure the very controversy that surrounds him offers to us a testimonial of the value and depth of his work and the need for airmen today to become familiar with his thought The progressive development of air power to the point where today it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest In fact in many ways the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision Douhet together with Hugh Boom Trenchard of Great Britain and William Billy Mitchell of the United States is justly recognized as one of the three great spokesmen of the early air power era This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book published in 1921 Readers may well find much that they disagree with in this book but also much that is of enduring value The vital necessity of Douhet's central vision that command of the air is all important in modern warfare has been proven throughout the history of wars in this century from the fighting over the Somme to the air war over Kuwait and Iraq

How Democracies Die Steven Levitsky, Daniel Ziblatt, 2019-01-08 NEW YORK TIMES BESTSELLER Comprehensive enlightening and terrifyingly timely The New York Times Book Review Editors Choice WINNER OF THE GOLDSMITH BOOK PRIZE SHORTLISTED FOR THE LIONEL GELBER PRIZE NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post Time Foreign Affairs WBUR Paste Donald Trump's presidency has raised a question that many of us never thought we'd be asking Is our democracy in danger Harvard professors Steven Levitsky and Daniel Ziblatt have spent more than twenty years studying the breakdown of democracies in Europe and Latin America and they believe the answer is yes Democracy no longer ends with a bang in a revolution or military coup but with a whimper the slow steady weakening of critical institutions such as the judiciary and the press and the gradual erosion of long standing political norms The good news is that there are several exit ramps on the road to authoritarianism The bad news is that by electing Trump we have already passed the first one Drawing on decades of research and a wide range of historical and global examples from 1930s Europe to contemporary Hungary Turkey and Venezuela to the American South during Jim Crow Levitsky and Ziblatt show how democracies die and how ours can be saved Praise for How Democracies Die What we desperately need is a sober dispassionate look at the current state of affairs Steven Levitsky and Daniel Ziblatt two of the most respected scholars in the field of democracy studies offer just that The Washington Post Where Levitsky and Ziblatt make their mark is in weaving together political science and historical analysis of both domestic and international democratic crises in doing so they expand the conversation beyond Trump and before him to other countries and to the deep structure of American democracy and politics Ezra Klein Vox If you only read one book for the rest of the year read How Democracies Die This is not a book for just Democrats or Republicans It is a book for all Americans It is nonpartisan It is fact based It is deeply rooted in history The best commentary on our politics no contest Michael Morrell former Acting Director of the Central Intelligence Agency via Twitter A smart and deeply informed book about the ways in which democracy is being undermined in dozens of countries around the world and in ways that are perfectly legal Fareed Zakaria CNN

Not for Profit Martha C. Nussbaum, 2016-11-08 In this short and powerful book celebrated philosopher Martha Nussbaum makes a passionate case for the importance of the liberal arts at all levels of education Historically the humanities have been central to education because they have been seen as essential for creating competent democratic citizens But recently Nussbaum argues thinking about the aims of education has gone disturbingly awry in the United States and abroad We increasingly treat education as though its primary goal were to teach students to be economically productive rather than to think critically and become knowledgeable productive and empathetic individuals This shortsighted focus on profitable skills has eroded our ability to criticize authority reduced our sympathy with the marginalized and different and damaged our competence to deal with complex global problems And the loss of these basic capacities jeopardizes the health of democracies and the hope of a decent world In response to this dire situation Nussbaum argues that we must resist efforts to reduce education to a tool of the gross national product Rather we must work to reconnect education to the humanities in order to give students the capacity to be true democratic citizens of their countries and the world In a new preface Nussbaum explores the current state of humanistic education globally and shows why the crisis of the humanities has far from abated Translated into over twenty languages *Not for Profit* draws on the stories of troubling and hopeful global educational developments Nussbaum offers a manifesto that should be a rallying cry for anyone who cares about the deepest purposes of education

Keeping Faith with the Constitution Goodwin Liu, Pamela S. Karlan, Christopher H. Schroeder, 2010-08-05 Chief Justice John Marshall argued that a constitution requires that only its great outlines should be marked and its important objects designated Ours is intended to endure for ages to come and consequently to be adapted to the various crises of human affairs In recent years Marshall's great truths have been challenged by proponents of originalism and strict construction Such legal thinkers as Supreme Court Justice Antonin Scalia argue that the Constitution must be construed and applied as it was when the Framers wrote it In *Keeping Faith with the Constitution* three legal authorities make the case for Marshall's vision They describe their approach as constitutional fidelity not to how the Framers would have applied the Constitution but to the text and principles of the Constitution itself The original understanding of the text is one source of interpretation but not the only one to preserve the meaning and authority of the document to keep it vital applications of the Constitution must be shaped by precedent historical experience practical consequence and societal change The authors range across the history of constitutional interpretation to show how this approach has been the source of our greatest advances from *Brown v Board of Education* to the New Deal from the *Miranda* decision to the expansion of women's rights They delve into the complexities of voting rights the malapportionment of legislative districts speech freedoms civil liberties and the War on Terror and the evolution of checks and balances The Constitution's framers could never have imagined DNA global warming or even women's equality Yet these and many more realities shape our lives and outlook Our Constitution will remain vital into our changing future the authors write if judges remain true to this rich tradition of adaptation and fidelity

Food Politics Marion Nestle, 2013-05-14 We all witness in advertising and on supermarket shelves the fierce competition for our food dollars In this engrossing expos Marion Nestle goes behind the scenes to reveal how the competition really works and how it affects our health The abundance of food in the United States enough calories to meet the needs of every man woman and child twice over has a downside Our over efficient food industry must do everything possible to persuade people to eat more more food more often and in larger portions no matter what it does to waistlines or well being Like manufacturing cigarettes or building weapons making food is big business Food companies in 2000 generated nearly 900 billion in sales They have stakeholders to please shareholders to satisfy and government regulations to deal with It is nevertheless shocking to learn precisely how food companies lobby officials co opt experts and expand sales by marketing to children members of minority groups and people in developing countries We learn that the food industry plays politics as well as or better than other industries not least because so much of its activity takes place outside the public view Editor of the 1988 Surgeon General's Report on Nutrition and Health Nestle is uniquely qualified to lead us through the maze of food industry interests and influences She vividly illustrates food politics in action watered down government dietary advice schools pushing soft drinks diet supplements promoted as if they were First Amendment rights When it comes to the mass production and consumption of food strategic decisions are driven by economics not science not common sense and certainly not health No wonder most of us are thoroughly confused about what to eat to stay healthy An accessible and balanced account *Food Politics* will forever change the way we respond to food industry marketing practices By explaining how much the food industry influences government nutrition policies and how cleverly it links its interests to those of nutrition experts this path breaking book helps us understand more clearly than ever before what we eat and why

We Were Caught Unprepared Matt M. Matthews,2011 This is a print on demand edition of a hard to find publication The fact that the outcome of the 2006 Hezbollah Israeli War was at best a stalemate for Israel has confounded military analysts Long considered the most professional and powerful army in the Middle East with a history of impressive military victories against its enemies the Israeli Defense Forces IDF emerged from the campaign with its enemies undefeated and its prestige tarnished This historical analysis of the war includes an examination of IDF and Hezbollah doctrine prior to the war as well as an overview of the operational and tactical problems encountered by the IDF during the war The IDF ground forces were tactically unprepared and untrained to fight against a determined Hezbollah force An insightful comprehensive examination of the war Illustrations

The Evolution of US Army Tactical Doctrine, 1946-76 Robert A. Doughty, 1979 This paper focuses on the formulation of doctrine since World War II In no comparable period in history have the dimensions of the battlefield been so altered by rapid technological changes The need for the tactical doctrines of the Army to remain correspondingly abreast of these changes is thus more pressing than ever before Future conflicts are not likely to develop in the leisurely fashions of the past where tactical doctrines could be refined on the battlefield itself It is therefore imperative that we apprehend future problems with as much accuracy as possible One means of doing so is to pay particular attention to the business of how the Army's doctrine has developed historically with a view to improving methods of future development

The Federalist Papers Alexander Hamilton, John Jay, James Madison, 2018-08-20 Classic Books Library presents this brand new edition of The Federalist Papers a collection of separate essays and articles compiled in 1788 by Alexander Hamilton Following the United States Declaration of Independence in 1776 the governing doctrines and policies of the States lacked cohesion The Federalist as it was previously known was constructed by American statesman Alexander Hamilton and was intended to catalyse the ratification of the United States Constitution Hamilton recruited fellow statesmen James Madison Jr and John Jay to write papers for the compendium and the three are known as some of the Founding Fathers of the United States Alexander Hamilton c 1755 1804 was an American lawyer journalist and highly influential government official He also served as a Senior Officer in the Army between 1799 1800 and founded the Federalist Party the system that governed the nation's finances His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States
