Hyperobjects Philosophy And Ecology After The End Of The World By Timothy Morton

Hyperobjects Timothy Morton, 2013-10-01 Having set global warming in irreversible motion we are facing the possibility of ecological catastrophe But the environmental emergency is also a crisis for our philosophical habits of thought confronting us with a problem that seems to defy not only our control but also our understanding Global warming is perhaps the most dramatic example of what Timothy Morton calls hyperobjects entities of such vast temporal and spatial dimensions that they defeat traditional ideas about what a thing is in the first place In this book Morton explains what hyperobjects are and their impact on how we think how we coexist with one another and with nonhumans and how we experience our politics ethics and art Moving fluidly between philosophy science literature visual and conceptual art and popular culture the book argues that hyperobjects show that the end of the world has already occurred in the sense that concepts such as world nature and even environment are no longer a meaningful horizon against which human events take place Instead of inhabiting a world we find ourselves inside a number of hyperobjects such as climate nuclear weapons evolution or relativity Such objects put unbearable strains on our normal ways of reasoning Insisting that we have to reinvent how we think to even begin to comprehend the world we now live in *Hyperobjects* takes the first steps outlining a genuinely postmodern ecological approach to thought and action

Hyperobjects Timothy Morton, 2013 Global warming is perhaps the most dramatic example of what Timothy Morton calls hyperobjects entities of such vast temporal and spatial dimensions that they defeat traditional ideas about what a thing is in the first place Morton explains what hyperobjects are and their impact on how we think how we coexist and how we experience our politics ethics and art

Dark Ecology Timothy Morton, 2016-04-12 Timothy Morton argues that ecological awareness in the present Anthropocene era takes the form of a strange loop or Möbius strip twisted to have only one side Deckard travels this oedipal path in *Blade Runner* 1982 when he learns that he might be the enemy he has been ordered to pursue Ecological awareness takes this shape because ecological phenomena have a loop form that is also fundamental to the structure of how things are The logistics of agricultural society resulted in global warming and hardwired dangerous ideas about life forms into the human mind Dark ecology puts us in an uncanny position of radical self knowledge illuminating our place in the biosphere and our belonging to a species in a sense that is far less obvious than we like to think Morton explores the logical foundations of the ecological crisis which is suffused with the melancholy and negativity of coexistence yet evolving as we explore its loop form into something playful anarchic and comedic His work is a skilled fusion of humanities and scientific scholarship incorporating the theories and findings of philosophy anthropology literature ecology biology and physics Morton hopes to reestablish our ties to nonhuman beings and to help us rediscover the playfulness and joy that can brighten the dark strange loop we traverse

Ecology Without Nature Timothy Morton, 2009-09-15 In *Ecology without Nature* Timothy Morton argues that the chief stumbling block to environmental thinking is the image of nature itself. Ecological writers propose a new worldview but their very zeal to preserve the natural world leads them away from the nature they revere. The problem is a symptom of the ecological catastrophe in which we are living. Morton sets out a seeming paradox: to have a properly ecological view, we must relinquish the idea of nature once and for all. *Ecology without Nature* investigates our ecological assumptions in a way that is provocative and deeply engaging. Ranging widely in eighteenth-century through contemporary philosophy, culture, and history, he explores the value of art in imagining environmental projects for the future. Morton develops a fresh vocabulary for reading environmentality in artistic form as well as content and traces the contexts of ecological constructs through the history of capitalism. From John Clare to John Cage, from Kierkegaard to Kristeva, from *The Lord of the Rings* to electronic life forms, *Ecology without Nature* widens our view of ecological criticism and deepens our understanding of ecology itself. Instead of trying to use an idea of nature to heal what society has damaged, Morton sets out a radical new form of ecological criticism: dark ecology.

Humankind Timothy Morton, 2017-08-22 A radical call for solidarity between humans and non-humans. What is it that makes humans human? As science and technology challenge the boundaries between life and non-life, between organic and inorganic, this ancient question is more timely than ever. Acclaimed object-oriented philosopher Timothy Morton invites us to consider this philosophical issue as eminently political. In our relationship with non-humans, we decide the fate of our humanity. Becoming human, claims Morton, actually means creating a network of kindness and solidarity with non-human beings in the name of a broader understanding of reality that both includes and overcomes the notion of species. Negotiating the politics of humanity is the first crucial step in reclaiming the upper scales of ecological coexistence and resisting corporations like Monsanto and the technophilic billionaires who would rob us of our kinship with people beyond our species.

The Ecological Thought Timothy Morton, 2012-04-02 In this passionate, lucid, and surprising book, Timothy Morton argues that all forms of life are connected in a vast entangling mesh. This interconnectedness penetrates all dimensions of life. No being, construct, or object can exist independently from the ecological entanglement. Morton contends, nor does Nature exist as an entity separate from the uglier or more synthetic elements of life.

Being Ecological Timothy Morton, 2018-03-09 A book about ecology without information dumping, guilt inducing, or preaching to the choir. Don't care about ecology? You think you don't, but you might all the same. Don't read ecology books. This book is for you. Ecology books can be confusing information dumps that are out of date by the time they hit you. Slapping you upside the head to make you feel bad. Grabbing you by the lapels while yelling disturbing facts. Handwringing in agony about what we are going to do. This book has none of that. *Being Ecological* doesn't preach to the eco choir. It's for you, even Timothy Morton explains, if you're not in the choir, even if you have no idea what choirs are. You might already be ecological. After establishing the approach of the book, no facts allowed, Morton draws on Kant and Heidegger to help us understand living in an age of mass extinction caused by global warming. He considers the object of ecological awareness and ecological thinking: the biosphere and its interconnections. He discusses what sorts of actions count as ecological, starting a revolution going to the garden center to smell the plants. And finally, in *Not a Grand Tour of Ecological Thought*, he explores a variety of current styles of being ecological: a range of overlapping orientations rather than preformatted self-labeling. Caught up in the us versus them or you versus everything else urgency of ecological crisis, Morton suggests it's easy to forget that you are a symbiotic being entangled with other symbiotic beings. Isn't that being ecological?

Spacecraft Timothy Morton, 2021-09-23 Science fiction is filled with spacecraft On Earth actual rockets explode over Texas while others make their way to Mars But what are spacecraft and just what can they teach us about imagination ecology democracy and the nature of objects Why do certain spacecraft stand out in popular culture If ever there were a spacecraft that could be detached from its context sold as toys turned into Disney rides parodied and flit around in everyone's head the Millennium Falcon would be it Springing from this infamous Star Wars vehicle Spacecraft takes readers on an intergalactic journey through science fiction and speculative philosophy revealing real world political and ecological lessons along the way In this book Timothy Morton shows how spacecraft are never mere flights of fancy

Realist Magic Timothy Morton, 2020-10-09 Object oriented ontology offers a startlingly fresh way to think about causality that takes into account developments in physics since 1900 Causality argues Object Oriented Ontology OOO is aesthetic In this book Timothy Morton explores what it means to say that a thing has come into being that it is persisting and that it has ended Drawing from examples in physics biology ecology art literature and music Morton demonstrates the counterintuitive yet elegant explanatory power of OOO for thinking causality This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use All rights not granted by the work's license are retained by the author or authors

Nothing Marcus Boon, Timothy Morton, Eric Cazdyn, 2015-10-16 Though contemporary European philosophy and critical theory have long had a robust engagement with Christianity there has been no similar engagement with Buddhism a surprising lack given Buddhism's global reach and obvious affinities with much of Continental philosophy This volume fills that gap focusing on nothing essential to Buddhism of course but also a key concept in critical theory from Hegel and Marx through deconstruction queer theory and contemporary speculative philosophy Through an elaboration of emptiness in both critical and Buddhist traditions an examination of the problem of praxis in Buddhism Marxism and psychoanalysis and an explication of a Buddhaphobia that is rooted in modern anxieties about nothingness Nothing opens up new spaces in which the radical cores of Buddhism and critical theory are renewed and revealed

Fundamental Processes in Ecology David M Wilkinson, 2007-09-13 *Fundamental Processes in Ecology* presents a way to study ecosystems that is not yet available in ecology textbooks but is resonant with current thinking in the emerging fields of geobiology and Earth System Science It provides an alternative process based classification of ecology and proposes a truly planetary view of ecological science To achieve this it asks and endeavours to answer the question what are the fundamental ecological processes which would be found on any planet with Earth like carbon based life The author demonstrates how the idea of fundamental ecological processes can be developed at the systems level specifically their involvement in control and feedback mechanisms This approach allows us to reconsider basic ecological ideas such as energy flow guilds trade offs carbon cycling and photosynthesis and to put these in a global context In doing so the book puts a much stronger emphasis on microorganisms than has traditionally been the case The integration of Earth System Science with ecology is vitally important if ecological science is to successfully contribute to the massive problems and future challenges associated with global change Although the approach is heavily influenced by Lovelock s Gaia hypothesis this is not a popular science book about Gaian theory Instead it is written as an accessible text for graduate student seminar courses and researchers in the fields of ecology earth system science evolutionary biology palaeontology history of life astrobiology geology and physical geography

Cultures of Taste/Theories of Appetite: Eating Romanticism T. Morton, 2004-01-16 Cultures of Taste Theories of Appetite brings two major critical impulses within the field of Romanticism to bear upon an important and growing field of research appetite and its related discourses of taste and consumption As consumption in all its metaphorical variety comes to displace the body as a theoretical site for challenging the distinction between inside and outside food itself has attracted attention as a device to interrogate the rhetoric and politics of Romanticism In brief the volume initiates a dialogue between the cultural politics of food and eating and the philosophical implications of ingestion digestion and excretion

Molecular Red McKenzie Wark, 2015-04-21 In Molecular Red McKenzie Wark creates philosophical tools for the Anthropocene our new planetary epoch in which human and natural forces are so entwined that the future of one determines that of the other Wark explores the implications of Anthropocene through the story of two empires the Soviet and then the American The fall of the former prefigures that of the latter From the ruins of these mighty histories Wark salvages ideas to help us picture what kind of worlds collective labor might yet build From the scientific pioneers who were trying to transform science during the Russia Revolution to visionaries contemplating cyborg possibilities and science fiction dreams in late 20th century California Molecular Red not only looks at the crisis of climate change that we face but also how we might be able to understand it and how we might salvage some hope out of the wreckage
