

In an attempt to protect their domestic film industry from Hollywood's global dominance, the governments of many countries subsidize the production or consumption of domestically made films. Suppose Australia's government gives each of its citizens a subsidy card. The card looks like a credit or debit card; each time these citizens go to see a domestically made film, they swipe their card to get a discount of \$6 off the price of a ticket.

The following graph represents the market for domestically made films in Australia without any subsidy. Adjust the graph to show the effect of the \$6 subsidy.

Tool tip: Click and drag one or both of the curves. Curves will snap into position, so if you try to move a curve and it snaps back to its original position, just try again and drag it a little farther.

After the domestic movie subsidy, the price a movie theater receives is _____, and the price paid by consumers is _____. This subsidy program costs Australia's government _____.
