Hybrid Teaching and Learning Kathryn E. Linder, 2017-03-31 Hybrid or blended classrooms are expanding on campuses across the United States and internationally. Intentionally combining in-class instruction with online activities not only aids student learning; it also provides more self-directed, technology-mediated learning experiences for students who will incorporate technology into their professional lives post-college. In addition to explaining and defining the phenomenon of hybrid teaching and learning, this volume answers: What is hybrid teaching and learning? How does it promote student learning? Why should faculty and administrators consider it? How are its components different from traditional classrooms? What are the best practices of hybrid course design? How can instructors incorporate accessibility into their hybrid courses? What models can be used to train faculty as hybrid teachers? Where is it being practiced? How can institutions best prepare students for and promote their success in hybrid courses? Who should be involved in implementing and supporting these initiatives at the institutional level? This is the 149th volume of the Jossey-Bass higher education series. It offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers.

Digital Images and Art Libraries in the Twenty-First Century Susan Wyngaard, 2013-04-03 Increase your knowledge of the digital technology that is essential for art librarianship today. *Digital Images and Art Libraries in the Twenty-First Century* is your key to cutting-edge discourse on digital image databases and art libraries. Just as early photographers tried to capture the world to make it accessible, now information professionals in art libraries and art museums are creating and sharing digital collections to make them broadly accessible. This collection shares the experience and insight of art information managers who have taken advantage of digital technology to expand the coverage and scope of image collections and improve access to previously difficult-to-locate information. In *Digital Images and Art Libraries in the Twenty-First Century*, you will learn step by step what goes into the planning and creation of these digital global museums and what advances are still being made in this rapidly evolving discipline. The pros and cons of these ventures are thoroughly examined as experts take you through the theoretical and practical issues they have faced along the way. *Digital Images and Art Libraries in the Twenty-First Century* will help you gain a better understanding of image censorship, web filters, user expectations, the comparative impact on the viewer of surrogate images versus artifacts, databases as an in-class teaching and learning tool. You can also read in depth about the existing digital image collections ArtSTOR and OhioLINK Digital Media Center DMC as well as the specific art library materials being considered for these collections. Find out what it takes to catalogue these materials and how the proliferation of digital images is changing the profession of art librarianship. *Digital Images and Art Libraries in the Twenty-First Century* is a thorough and highly specialized book suitable for expert librarians and visual resource curators, but its straightforward style also makes it suitable for beginners and students interested in library and information science programs.

Reassessing the Social Studies Curriculum Wayne Journell, 2016-05-03 The terrorist attacks of September 11 2001 dramatically changed many aspects of American society and the ramifications of that horrific event are still impacting the domestic and foreign policies of the United States Yet fifteen years after 9 11 an event that was predicted to change the scope of public education in the United States we find that the social studies curriculum remains virtually the same as before the attacks For a discipline charged with developing informed citizens prepared to enter a global economy such curricular stagnation makes little sense This book which contains chapters from many leading scholars within the field of social studies education both assesses the ways in which the social studies curriculum has failed to live up to the promises of progressive citizenship education made in the wake of the attacks and offers practical advice for teachers who wish to encourage a critical understanding of the post 9 11 global society in which their students live

The Magic Power of Mental Images Dean Amory, 2013-05-15 Jos Ortegay Gasset was so impressed by the power of metaphors that he compared them to a tool for creation which God forgot inside of us when he created man When I asked myself where metaphors get this tremendous power from I realized that mankind has an even much more powerful tool at its disposition Mental Imagery Mental Imagery is the key to achieving our goals and the internal screen on which we project our dreams It allows us to simulate procedures familiarize with environments and situations before we get to know them in real life It helps us to relax but just as well will arouse us or prepare us for future actions With the help of Mental Imagery we can build confidence and readiness stimulate healing and recovery change our behaviour or literally borrow the mind of a genius How to learn and implement this power and benefit from its many advantages is what this book is all about
