White Logic, White Methods Tukufu Zuberi, Eduardo Bonilla-Silva, 2008 Examines how the racial lenses of the social sciences and the subscription of social scientists to whites racial common sense have limited their understanding of racial matters and handicapped their capacity to appreciate the significance of the race effect they call it the racial stratification effect With an assemblage of leading scholars White Logic White Methods explores the possibilities and necessary dethroning of current social research practices and demands a complete overhaul of current methods towards a multicultural and pluralist approach to what we know think and question Readers in various social sciences will find useful the chapters in the collection but all will agree that the introductory and concluding chapters to the volume Towards a Definition of White Logic and White Methods and Telling the Real Tale of the Hunt Towards a Race Conscious Sociology of Racial Stratification are likely to become classics in the field of racial and ethnic relations

White Logic, White Methods Tukufu Zuberi, Eduardo Bonilla-Silva, 2008-05-02 In this collection of essays the authors examine how racial considerations have affected the way social science is conducted how issues are framed and data is analyzed With an assemblage of leading scholars White Logic White Methods explores the possibilities and necessary dethroning of current social research practices and demands a complete overhaul of current methods towards multicultural and pluralist approach to what we know think and question

Thicker Than Blood Tukufu Zuberi, 2001 Tukufu Zuberi offers a concise account of the historical connections between the development of the idea of race and the birth of social statistics Zuberi describes the ways race differentiated data is misinterpreted in the social sciences and asks searching questions about the ways racial statistics are used He argues that statistical analysis can and must be deracialized and that this deracialization is essential to the goal of achieving social justice for all

The Death of White Sociology Joyce A. Ladner, 1998

Race Relations Stephen Steinberg, 2007-07-17 Stephen Steinberg offers a bold challenge to prevailing thought on race and ethnicity in American society In a penetrating critique of the famed race relations paradigm he asks why a paradigm invented four decades before the Civil Rights Revolution still dominates both academic and popular discourses four decades after that revolution On race Steinberg argues that even the language of race relations obscures the structural basis of racial hierarchy and inequality Generations of sociologists have unwittingly practiced a white sociology that reflects white interests and viewpoints What happens he asks when we foreground the interests and viewpoints of the victims rather than the perpetrators of racial oppression On ethnicity Steinberg turns the tables and shows that the early sociologists who predicted ultimate assimilation have been vindicated by history The evidence is overwhelming that the new immigrants including Asians and most Latinos are following in the footsteps of past immigrants footsteps leading into the melting pot But even today there is the black exception The end result is a dual melting pot one for peoples of African descent and the other for everybody else *Race Relations A Critique* cuts through layers of academic jargon to reveal unsettling truths that call into question the nature and future of American nationality

Racism without Racists Eduardo Bonilla-Silva, 2006-08-03 In this book Bonilla Silva explores with systematic interview data the nature and components of post civil rights racial ideology Specifically he documents the existence of a new suave and apparently non racial racial ideology he labels color blind racism He suggests this ideology anchored on the decontextualized ahistorical and abstract extension of liberalism to racial matters has become the organizational matrix whites use to explain and account for racial matters in America

The Habits of Racism Helen Ngo,2017-08-16 The Habits of Racism examines some of the complex questions raised by the phenomenon and experience of racism Helen Ngo draws on the resources of Merleau Ponty to show how the conceptual reworking of habit as bodily orientation helps to identify the subtle but more fundamental workings of racism to catch its insidious gestural expressions as well as its habitual modes of racialized perception Racism as Ngo argues is equally expressed through bodily habits which once reformulated raises important ethical questions regarding the responsibility for one s racist habits Ngo also considers what the lived experience of racism and racialization teaches us about the nature of embodied and socially situated being arguing that racialized embodiment problematizes and extends existing accounts of embodied experience and calls into question dominant philosophical paradigms of the self as coherent fluid and synchronous Drawing on thinkers such as Fanon she argues that the racialized body is in front of itself and uncanny in the Heideggerian senses of strange and not at home while exploring the phenomenological and existential implications of this disorientation and displacement Finally she returns to the visual register to take up the question of objectification in the racist gaze critically examining the subject object ontology presupposed by Sartre s account of the gaze le regard Recalling that all embodied being is always already relational and co constituting Ngo draws on Merleau Ponty s concept of the intertwining to argue that a phenomenology of racialized embodiment reveals to us the ontological violence of racism not a merely violation of one s subjectivity as commonly claimed but also a violation of one s intersubjectivity The original arguments in The Habits of Racism will be of particular value to students and scholars interested in critical philosophy of race phenomenology and social and political philosophy and may also be of interest to those working in feminist philosophy queer studies and disability studies

Reinventing Racism Jonathan D. Church, 2020-12-03 The theory of white fragility is one of the most influential ideas to emerge in recent years on the topics of race racism and racial inequality White fragility is defined as an unwillingness on the part of white people to engage in the difficult conversations necessary to address racial inequality This fragility allegedly undermines the fight against racial inequality Despite its wide acclaim and rapid acceptance the theory of white fragility has received no serious and sustained scrutiny This book argues that the theory is flawed on numerous fronts The theory functions as a divisive rhetorical device to shut down debate It relies on the flawed premise of implicit bias It posits a faulty way of understanding racism It has serious methodological problems It conflates objectivity and neutrality It exploits narrative at the expense of facts It distorts many of the ideas upon which the theory relies This book also offers a more constructive way to think about Whiteness white privilege and white fragility pointing us to a more promising vision for addressing racial inequality
