Philosophical Foundations of Leadership David Cawthorn, 2017-07-28 The nature of leadership and the human qualities that promote or inhibit it have a long history in Western thought and remain a central concern in modern societies Crises in leadership may arise from either human failings or social complexities that defeat or reject those most qualified to lead While most contemporary political or social commentators on such crises tend to focus on external circumstances David Cawthorn examines classical thinkers from Plato to Nietzsche to offer a historical and philosophical perspective on the intrinsic qualities of leadership and how these qualities are coded into the souls of some but not of others

The New Psychology of Leadership S. Alexander Haslam, Stephen D. Reicher, Michael J. Platow, 2010-09-13 Winner of the University of San Diego Outstanding Leadership Book Award 2012 Shortlisted for the British Psychological Society Book Award 2011 Shortlisted for the CMI Chartered Management Institute Management Book of the Year Award 2011 2012 According to John Adair the most important word in the leader's vocabulary is we and the least important word is I But if this is true it raises one important question why do psychological analyses of leadership always focus on the leader as an individual as the great I One answer is that theorists and practitioners have never properly understood the psychology of we-ness This book fills this gap by presenting a new psychology of leadership that is the result of two decades of research inspired by social identity and self-categorization theories The book argues that to succeed leaders need to create champion and embed a group identity in order to cultivate an understanding of us of which they themselves are representative It also shows how by doing this they can make a material difference to the groups organizations and societies that they lead Written in an accessible and engaging style the book examines a range of central theoretical and practical issues including the nature of group identity the basis of authority and legitimacy the dynamics of justice and fairness the determinants of followership and charisma and the practice and politics of leadership The book will appeal to academics practitioners and students in social and organizational psychology sociology political science and anyone interested in leadership influence and power
