Hearing the Old Testament Craig G. Bartholomew, David J. H. Beldman, 2012-05-02 In *Hearing the Old Testament* world class scholars discuss how contemporary Christians can better hear and appropriate God's address in the Old Testament. This volume is part of a growing interest in theological interpretation of the Old Testament. Editors Craig G. Bartholomew and David J. H. Beldman offer a coherent and carefully planned volume, a truly dialogical collaboration full of up-to-date research and innovative ideas. While sharing a desire to integrate their Old Testament scholarship with their love for God and thus a commitment to listening for God's voice within the text, the contributors display a variety of methods and interpretations as they apply a Trinitarian hermeneutic to the text. The breadth, expertise, and care evidenced here make this book an ideal choice for upper-level undergraduate and seminary courses. Contributors: Craig G. Bartholomew, David J. H. Beldman, Mark J. Boda, M. Daniel Carroll, R. Stephen G. Dempster, Tremper Longman III, J. Clinton McCann Jr, Iain Provan, Richard Schultz, Aubrey Spears, Heath Thomas, Gordon J. Wenham, Al Wolters, Christopher J. H. Wright.

The Hidden Habits of Genius Craig Wright, 2020-10-06 An unusually engaging book on the forces that fuel originality across fields. Adam Grant, looking at the 14 key traits of genius from curiosity to creative maladjustment to obsession, Professor Craig Wright, creator of Yale University's popular Genius Course, explores what we can learn from brilliant minds that have changed the world: Einstein, Beethoven, Picasso, Jobs. The word genius evokes these iconic figures whose cultural contributions have irreversibly shaped society. Yet Beethoven could not multiply, Picasso couldn't pass a 4th grade math test, and Jobs left high school with a 2.65 GPA. What does this say about our metrics for measuring success and achievement today? Why do we teach children to behave and play by the rules when the transformative geniuses of Western culture have done just the opposite? And what is genius really? Professor Craig Wright, creator of Yale University's popular Genius Course, has devoted more than two decades to exploring these questions and probing the nature of this term, which is deeply embedded in our culture. In *The Hidden Habits of Genius*, he reveals what we can learn from the lives of those we have dubbed geniuses past and present. Examining the lives of transformative individuals ranging from Charles Darwin and Marie Curie to Leonardo da Vinci and Andy Warhol to Toni Morrison and Elon Musk, Wright identifies more than a dozen drivers of genius characteristics and patterns of behavior common to great minds throughout history. He argues that genius is about more than intellect and work ethic; it is far more complex, and that the famed eureka moment is a Hollywood fiction. Brilliant insights that change the world are never sudden but rather they are the result of unique modes of thinking and lengthy gestation. Most importantly, the habits of mind that produce great thinking and discovery can be actively learned and cultivated, and Wright shows us how. This book won't make you a genius. But embracing the hidden habits of these transformative individuals will make you more strategic, creative, and successful, and ultimately happier.

Beethoven: The Music and the Life Lewis Lockwood, 2005-01-04 Written for the general reader, this book reveals how Beethoven's great works reflect both his artistic individuality and the deepest philosophical and political currents of his age.
